

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

The Possession of *British New Guinea* was declared to be a Territory under the authority of the Australian Commonwealth, and to be known by the name of the "Territory of Papua" by the Papua Act of 1905, which was brought into force by a Proclamation issued by the Commonwealth Government on September 1st, 1907.

(i) In accordance with the provisions of the "Commonwealth of Australia Constitution Act, 1900," the Customs, Excise, Post Office and Defence Departments of each State were transferred to the Commonwealth Government in 1901. The above figures are inclusive of such Revenue as is collected by the Commonwealth Government from that date. (j) Including dividends from Savings Bank Investments in 1893 and later years. (k) Excluding an Imperial grant of 10,000*l.* for telegraph construction. (l) The increased revenue was mainly due to the inclusion of railway receipts, the railway being transferred to the Jamaican Government during the year. (m) Exclusive of Imperial grants. (n) Including, for St. Lucia from 1896 and St. Vincent from 1898, amounts received from municipal authorities and the Immigration Fund for the payment of interest and redemption of principal of loans guaranteed by the Colony. (o) For nine months ended 31st December, 1905. (p) Including Uganda Railway profit (68,836*l.* in 1905–6, and 231,375*l.* in 1906–7). (q) Exclusive of Head Office Revenue of the British South Africa Company. (r) The reduced revenue is due to an alteration in the manner of showing the earnings and working expenses of the State railways. For the first time, the *net* receipts of the railways are shown under Revenue, the working expenses being deducted from the total earnings instead of being entered on the expenditure side as hitherto.

sea trade only. The tonnage of Ships entered and cleared in the Lake and River trade between Canada and the United States was as follows :—

12,738,974	11,486,746	15,293,916	17,813,868	15,375,500	16,689,365	17,888,743	North America : Dominion of Canada (*e*).

(*l*) The decrease was due to a foreign line of steamers not touching at Seychelles as in former years.

(*m*) The figures given for 1904 and later years represent the shipping of Australia *direct* with places outside the Commonwealth—the shipping returns having been compiled for the first time by the Federal Government in 1904, and not by each State as in former years. Comparative figures (*i.e.*, excluding inter-State shipping) for years prior to 1904 cannot be given for the Commonwealth as a whole, as vessels trading with more than one State from or to places outside the Commonwealth were, as a rule, included in the returns of each of those States.

(*n*) Excluding transports from 1899 inclusive.

(*p*) The decrease was partly due to the plague in New South Wales.

(*r*) For the 15 months ended 31st March 1904.

(*s*) The figures for 1892 and 1893 represent the tonnage of vessels entered and cleared, *with cargoes* only.

(*t*) Including transports carrying stores, but excluding those conveying troops from 1899 inclusive.

(*u*) The Colony and Protectorate of Southern Nigeria were placed under the same administration from May 1st 1906, and the trade and shipping returns for both the Colony and the Protectorate are now amalgamated—the trade between the Colony and Protectorate being treated as Coasting Trade.

Note.—Particulars for years prior to 1899 for *the Australian Commonwealth as a whole* cannot be given. It is stated in the original returns that the above statement is to be taken as accurate only so far as the years 1903 to 1906 are concerned. In the preceding years the articles have been classified as nearly as possible on the same basis as in later years, but it has been found a matter of great difficulty, owing not only to the want of uniformity in the classification of articles in the various States, but also to the differences in classification between 1903 and previous years.

(*a*) It is stated in the original Commonwealth Trade Returns for 1904 that "prior to September 1st 1903, it was not the practice in the various State Customs Offices to record transhipments. It follows that goods arriving from beyond the Commonwealth at any Australian port and thence transhipped to another State were recorded in the State in which they ultimately arrived as an import from the transhipping State, and not, as they are now, as an oversea import. The figures shown above represent the estimated value of such transhipments, and must be added to the recorded imports to obtain the true gross import from Countries beyond the Commonwealth."

Note.—Particulars for years prior to 1899 for *the Australian Commonwealth as a whole* cannot be given. It is stated in the original returns that the above statement is to be taken as accurate only so far as the years 1903 to 1906 are concerned. In the preceding years the articles have been classified as nearly as possible on the same basis as in later years, but this has been found a matter of great difficulty, owing not only to the want of uniformity in the classifications of articles in the various States but also to the differences in classifications between 1903 and previous years.

(*a*) It is stated in the original Commonwealth Trade Returns for 1904 that "Prior to September 1st 1903 it was the practice in most of the States for goods of local produce despatched from one Australian State to another for transhipment beyond the Commonwealth to be recorded only as inter-State transfers from the original State, no notice being taken of the oversea export. The present practice is to count such goods as being exported from the place where they are actually placed on board oversea vessels so as to avoid the possibility of transhipment being treated as exports at the place of production and at the place of final export." No reliable estimate of the values of these transhipments prior to September 1st 1903 can be given, but in 1904 they amounted to 3,655 128*l.*

(*b*) Exclusive of the value of goods shipped as ship's stores in Australian ports on board vessels bound for oversea countries (valued at £875,966), which was included in years prior to 1906.

In August, 1898, this Tariff was superseded by the *British Preferential Tariff*, which confined the benefits to goods (except alcoholic liquors, tobacco, and, in certain cases, sugar) the produce or manufacture of the United Kingdom and certain British Possessions when imported direct, and a reduction of ¼th of the general duty was allowed to the 30th June, 1900, and ½rd of the duty after that date. Preferential Treatment was extended to South African products from 1st July, 1904. Under Act No. 11 of 1904, there were slight amendments of the preference allowed on woollens, cordage, china tableware and common window glass from June 7th, 1904.

Under Act No. 11 of 1907, which came into force on November 30th, 1906, the Customs Tariff was revised, whereby varying rates of preferential duties were accorded to various United Kingdom and Colonial products.

Under Act No. 15 of 1903, articles which are the growth, produce, or manufacture of Germany, were, from April 17th, 1903, subject to a *surtax* of ½rd of the duties charged under the General Tariff. This *surtax* was continued by the Customs Tariff Act No. 11 of 1907.

(*f*) The Uganda Protectorate Authorities state that the Uganda Postal System is merged in that of the British East Africa Protectorate.

(*g*) The Post Office was opened in June, 1903, and for the first few months large quantities of stamps were sold to collectors and dealers.

(*h*) The increased expenditure was due to the purchase of a new postage stamp die and to a supply of a new issue of stamps.

(a) For details of the production of wheat in the several Australian States, *see* Table No. 39, pp. 286–7.

(b) The trade returns were compiled by the Commonwealth Government for the first time in 1903, instead of by each State as in former years, but comparative statements were given from 1899 inclusive. Prior to that date the domestic exports from the Commonwealth cannot be given, as re-exports of Australian wheat are not distinguished in the trade returns for certain States of the Commonwealth.

NOTES.—For rates of exchange, *see* Table No. 2, p. 5.

An Enactment was passed in each of the Federated Malay States in 1904, which provided for the Registration of Imports and Exports.

(*a*) The Perak returns of exports are defective as regards timber and firewood—more particularly prior to 1897.

(*b*) In 1895 a confederation of the States of Sungei Ujong and Jelebu with the State of Negri Sembilan was formed under the title of Negri Sembilan.

(*c*) The returns of imports and exports by sea are for the principal ports only. Overland trade is excluded for the years 1892 to 1898; in later years it is partially included.

(*d*) Including "Gold, (cyanide)" and "Gold concentrates," after the year 1898.

(*e*) It is stated in the original returns that the value of the imports into Pahang for 1899 is probably over-estimated, as a large quantity of goods of which the real value was unknown, was arbitrarily valued at $450,000.
